

Does your company sell eco-innovative products or services?

If so, we could help you to gain access to major buyers of truly innovative sustainable products and services from across the UK as part of the SUSCIN programme's series of Green Dragon events. A limited number of hand-picked suppliers will be invited to attend a 'Dragons Den' style event in the South East, with the 'Dragons' being representatives from major UK companies interested in encouraging and purchasing eco-innovative products and services. Each hand-picked supplier will also receive free, bespoke help and support, preparing you to meet the 'Dragons' on the day.

We're currently building up a database of eco-innovative suppliers from across the South East of England, which we will then use to match products and services with buyers and then invite a certain number of successful suppliers to receive free support and advice and to attend one of the free Green Dragons events taking place in the Autumn. If you think that your sustainable products or services are truly innovative, please complete the application form at <http://www.surveymonkey.com/s/VTKW7LK> by 5pm on Friday 29th July (if you would prefer an application form in an alternative format, please just let me know).

This is a unique opportunity to present your innovations to major players in the UK market, so apply now for your chance to be involved.

Kind regards,
Leanne

PS. If you'd like to see past Green Dragons events in action, please visit <http://www.actionsustainability.com/green-dragons/>
